

Greeshma Chandran

MSc Investigative Psychology (Distinction) · ForenPsyD Candidate · GMBPsS

PSYCHOLOGIST

Graduate Member, BPS

Healing, resilience and safer futures through compassionate, evidence-based care.

PROFESSIONAL PROFILE

Greeshma Chandran is a psychologist currently completing her Doctorate in Forensic Psychology (ForenPsyD) at the University of Birmingham. She has experience providing specialised clinical interventions for clients presenting with complex trauma, emotional regulation difficulties, and social skills deficits, drawing on evidence-based frameworks including the Attachment, Regulation, and Competency (ARC) model and Cognitive Behavioural Therapy (CBT). She is trained in forensic risk assessment tools including HCR-20, SAPROF, Sexual Violence Risk-20 (SVR-20), and VRAG-R, and is proficient in a range of standardised assessments across clinical and forensic contexts. Her experience spans forensic inpatient settings, youth justice services, and early intervention programmes for children and families in Singapore and the United Kingdom.

CLINICAL & FORENSIC EXPERTISE

- ✓ Delivers trauma-informed psychological interventions using the Attachment, Regulation, and Competency (ARC) model and CBT across forensic and clinical settings.
- ✓ Conducts forensic risk assessments using tools including HCR-20, SAPROF, SVR-20, and VRAG-R.
- ✓ Conducts psychological assessments including the Wechsler range of assessments, NEPSY-II, BRIEF, and adaptive behaviour measures.
- ✓ Prepares psychological reports for clinical, forensic, legal, and educational purposes — including psycho-legal and school placement reports.
- ✓ Provides consultation to multidisciplinary teams and youth justice case workers on case formulation and risk management.
- ✓ Works collaboratively with clients on case conceptualisation, recovery plans, and relapse prevention.
- ✓ Experienced in Mental Capacity Act (MCA) assessments and Assisted Deputyship Application Programme (ADAP) evaluations.
- ✓ Skilled in working with justice-involved youth, individuals with developmental disabilities, and complex clinical presentations.
